and all other cards count their face value.

Four of a kind is = - 20, including Queens

4 Jacks = - 30

4 Kings = - 40

4 Jokers = - 50

The game has 9 rounds and the lowest score wins.

Deal 8 cards face down. Do Not Look at these cards.

After all 8 cards are dealt out, look at only two of the cards and remember there value.

If both card in a column are turned up you can still replace one of them.

Match vertical cards equal zero.

After someone has all cards face up. All others get only one more draw. However, cards face up cannot be taken up for the final round.

If card comes off of main stack and you do not want it, that card can be discarded. If this is done, you must turn over one of your face down cards.
